

Cookie Information

Prepared 18 September 2026 | English version

Scope

This document explains cookies and similar device technologies in connection with the TUREDDI YACHTS website operated by TUREDDI GROUP LIMITED. It must be read with our Privacy Notice. The accompanying deployment schedule must be completed from a technical audit before this review issue is published as a statement of the live website's configuration.

1 Operator

TUREDDI GROUP LIMITED is incorporated in England and Wales under company number 15210693, with its registered office at 35 Dover Street, Mayfair, London, W1S 4NQ, United Kingdom. It operates internationally, including through its permanent establishment in Italy (Codice Fiscale 91066550467) and shipyard operations in the Kingdom of Bahrain. Legal and privacy enquiries: legal@tureddigroup.com. Marketing and administration: administration@tureddigroup.com. Postal correspondence may be addressed to the registered office, marked for the Legal Department.

2 What these technologies do

Cookies are small pieces of information stored on a device. Similar technologies include local storage, tracking pixels and other mechanisms that store or access device information. They may enable a requested function, remember choices, measure use or support advertising. First-party technologies are associated with the website being visited; third-party technologies involve another provider. Session technologies normally expire at the end of a session; persistent technologies remain for a specified duration unless removed earlier.

3 Categories and choices

Strictly necessary technologies support transmission or a service explicitly requested by the visitor, such as a genuine security function or recording privacy choices. They do not require cookie consent where the relevant exemption applies; the exemption must be assessed by purpose, not by the provider's label.

Optional preferences remember non-essential choices. Analytics measure site use. Marketing technologies may measure campaigns or track interests across services. Third-party media, maps or other embeds can introduce their own storage or access. These descriptions explain possible categories, not a claim that each is installed.

TUREDDI's proposed common UK and EU configuration requires prior opt-in for optional technologies, including analytics, even where a narrower local exemption might be available. Necessary functions remain available without optional consent. Personal-data processing also requires an appropriate data protection lawful basis.

4 Giving and withdrawing consent

The deployed consent interface must allow visitors to accept all optional technologies, reject them, or select purposes, with equally accessible accept and reject choices. Optional selections must be off by default. Silence, scrolling, continued browsing and acceptance of website terms do not constitute consent. Refusing optional technologies must not prevent access to ordinary site content. An optional external feature may remain disabled until the visitor chooses to enable it.

A persistent Cookie settings control must allow choices to be reviewed and changed. Withdrawal must stop future optional storage and access; previously shared data may also be subject to the relevant provider's retention and deletion procedures. Browser controls can remove or block cookies, but they do not necessarily remove every form of storage or recall information already disclosed. Some necessary functions may stop working when storage is blocked.

5 Providers and international transfers

Before any optional technology is enabled, the consent interface or linked inventory must identify its provider, purpose, duration, category and relevant privacy information. Where personal data is transferred internationally, the safeguards described in our Privacy Notice apply. Do not assume that all third-party data remains in the UK or EEA. An ordinary outbound link must be distinguished from an automatically loaded embed.

6 Deployment schedule requiring technical completion

No cookie names, providers or durations have been verified for this review issue. Do not publish an empty inventory or describe the website as cookie-free on that basis. For every cookie, local-storage key, pixel, SDK or comparable technology actually present, record:

Name or identifier; provider and domain; precise purpose; data accessed or stored; category and exemption or consent requirement; expiry or duration; recipients and destination countries; provider privacy link; and the technical condition that blocks or enables it.

The completed inventory must cover the initial page load, rejection, selective consent, full consent, withdrawal, enquiry forms, client registration, embedded content and mobile navigation. Technologies absent from the audit must not be listed as active. Confirm that the visible Cookie settings control works before publication.

7 Updates

Update this information and the inventory when technologies, providers or purposes change. Obtain fresh consent where required before activating a new optional purpose. Privacy enquiries should be sent to legal@tureddigroup.com.
