Tureddi partners with VYD Studio on Navetta 42

# VYD

## VYD Studio

VYD Studio is a team of experienced and competent professionals located all around the world and recognised by the international yachting community. We never stop learning, broaden our limits, improve our skills, master new technologies, or improve our customer service. Our goal is to create innovative, elegant and cutting edge yachts relevant even in 20 years time!

## PAOLO DOSE

EXPLORER, DESIGNER AND FOUNDER OF VYD

Our purpose precepts the form of the object, the object designs the integral space, the space serves the person's needs and ambitions. Aesthetics and ergonomics, innovations and minimalism are the qualities that we design the space with for the people creating the future. The sobriety is where we lead; a desire to show off is turning into a search for simple elegance without compromising the relationship between humankind and nature. A refuse to buy what we're told are "must-have" items, to challenge our primitive instinct of wanting more in which we find ourselves in another dimension of life. Elegance is not conforming to the dictates of others — the minimalism and elegance is the essence of calming design.

# TUREGGI

**Two generations of master yacht builders, a father and son, work together to deliver your dream yacht. We offer expert craftsmanship and state-of-the-art facilities, producing superyachts up to 60 meters in alloy with Italian flair. The shipyard has an over 4000-square-meter covered area and 70 shipyard craftsmen who are able to build up to four custom projects simultaneously. This is Tureggi, a landmark in the Italian superyacht builders' panorama.**

Drawing from the solid experience gained over the years in supplying components that enabled the first generation to craft finished boats for third parties, ranging from Superyachts to racing motorboats, and including the refit of historic sailing boats like the S/Y Invader, the group decided to establish its own business. In collaboration with renowned architects, they set out to create their signature products.

Our shipyard represents a unique fusion of British corporate governance and Italian craftsmanship. Based in the UK, our company adheres to the stringent standards, legal frameworks, and procedural rigor characteristic of British corporate entities.

Despite our UK domicile, the soul of our yachts is quintessentially Italian. We proudly produce our vessels in Italy, leveraging the country's storied tradition of yacht construction and its reputation as a world hub of yachting. Our yachts are crafted in the renowned shipbuilding areas of Viareggio and Pisa, where

the Italian flair for design and luxury is evident in every curve and contour. By marrying the Italian passion for aesthetics and attention to detail with the British ethos of corporate excellence, we create yachts that are not only visually stunning but also built to the highest standards of quality and performance. The 'Made in Italy' label is a testament to the unparalleled craftsmanship and innovative spirit that goes into each of our yachts, ensuring that they resonate with the luxury and sophistication that clients expect from Italian-built vessels. Tureddi is upholding the highest standards of both British business practices and Italian yacht-building heritage.

The Group currently includes 6 controlled and associated companies:

- **Cantieri Navali Tureddi Group Spa – Group leader**
- **R.T. Service S.r.l. – Outfitting and services**
- **Yachtcarp S.r.l. – Steel and aluminum carpentry**
- **Lassen Line S.r.l. – Welding and laser cutting**
- **P.B.S. Mixology S.r.l. – Event organisation and management.**
